sunday: 2011

Welcome to the new 2011 Sunday Bikes catalog! From Wave tubing to hollow dropouts and from 41-Thermal heat-treating to Plus-4 geometry, Sunday has always emphasized innovation, aesthetics and improvements in design. This year's line up continues that tradition. Our latest bikes still have the highest quality parts available for your dollar, easily making them the most "complete" completes out there today. Additionally, our aftermarket frames, forks and bars host a load of new features, and they're still being built with the same care and attention to detail that we started with way back in 2005. It's always our goal to keep doing what we do best so you can keep having as much fun as you possibly can on your new Sunday. We hope you enjoy the 2011 line as much as we do.

Thanks for your support!
